

DHRUTHI M KASHYAP

Bangalore, Karnataka • dhruthimkashyap@gmail.com • [LinkedIn](#) • [GitHub](#)

MERN Stack Developer (React.js, Node.js, Express.js, MongoDB) with experience building full-stack web apps, RESTful APIs, and a blockchain-based DApp. Research background in Digital Twin healthcare systems using ML. Recognized with 1st Place at Intuit Innovation Challenge 2025 and published in a UGC-CARE journal.

EDUCATION

B.E. – Information Science & Engineering | Cambridge Institute of Technology, Bangalore | Sept 2021 - Aug 2025
| CGPA: 9.05 / 10

EXPERIENCE

MERN Stack Trainee | Dyashin Technosoft, Bangalore | Jan 2026 – Present

- Built and maintained full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
- Developed and tested RESTful APIs using Postman; handled authentication, validation, and error handling.
- Designed MongoDB and MySQL schemas; optimized SQL queries to improve backend performance.
- Contributed to responsive UI development and scalable application architecture.

Research Intern | CCCIR, Bengaluru | Sep 2024 – Jan 2025

- Worked on Digital Twin in Healthcare research using cardiology and radiology datasets.
- Performed data preprocessing, feature engineering, and EDA; built predictive models using CNNs, RNNs, SVMs, and Decision Trees.
- Contributed to real-time health monitoring, anomaly detection, and AI-assisted clinical decision support prototypes.

Position of Responsibility - Curation Lead | Microsoft Student Club, CIT | Sep 2023 – Jul 2024

- Led technical curation, workshops, and peer-learning sessions for 200+ students; organized club events and mentorship programs.

PROJECTS

RealEstate DApp (Blockchain) — React (Vite), Solidity, Hardhat, Ethers.js, IPFS, Ethereum Sepolia

- Built a decentralized real estate platform where properties are tokenized as NFTs on the Ethereum blockchain.
- Implemented an escrow smart contract with role-based workflows for buyers, sellers, lenders, and property inspectors.
- Used Pinata (IPFS) for decentralized property metadata storage and JSON Server for listing management.
- **Won 1st Place at Intuit Innovation Challenge 2025 for this project.** GitHub: [RealEstate-Dapp-Sepolia](#)

News24-7 – Real-Time News App — React.js, Vite, Bootstrap, GNews API, NewsAPI

- Developed a responsive news web app with real-time article fetching, category-based filtering, and infinite scrolling.
 - Built reusable React components with client-side routing and environment-variable-based API management.
- GitHub: [news24-7](#)

Book Management REST API — Node.js, Express.js, Postman

- Designed a full CRUD RESTful API with modular routing, middleware (logging, validation), and file-based JSON storage.
- Endpoints: GET/POST/DELETE /books and /books/:id. Tested all flows with Postman. GitHub: [book-management](#)

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Next.js

Backend & Databases: Node.js, Express.js, MongoDB, Mongoose, MySQL

Blockchain: Solidity, Hardhat, Ethers.js, IPFS

Languages & Tools: JavaScript, SQL, Git, GitHub, Postman, VS Code

CERTIFICATIONS & ACHIEVEMENTS

- 1st Place – Intuit Innovation Challenge 2025 (blockchain-based real estate automation project)
- Published research in UGC-CARE Gradiva Review Journal on smart-contract-driven property transactions
- MERN Stack Certification – Apna College
- Best Project Award for Technical Complexity – Intuit 2025
